International Workshop on B Physics & CP Violation BCP4

February 19-23, 2001, Ise-Shima, Japan

The 4th International Workshop on B physics and CP violation will be held in Ise-Shima, Japan, during February 19-23, 2001. Local organizers are from Nagoya University. The first of the series was held in Nagoya in 1994. The second one of the series was held in Honolulu and the third in Taipei. In Taipei, the international advisory committee met and decided that this workshop should now be held annually as both asymmetric B factories are in operation. The committee has also decided that the 4th meeting should be held in central Japan, and the 5th meeting should be held in Philadelphia.

B factories offer various opportunities to look for new physics at presently accessible energies. Belle, Babar, and CLEO are taking data and the next few years represent very exciting period for B physics. We will welcome the new century by getting together and discuss beauty physics and CP violation.
