

Concluding Remarks

Taku Yamanaka

2009年 特定領域研究会

愛知県額田郡

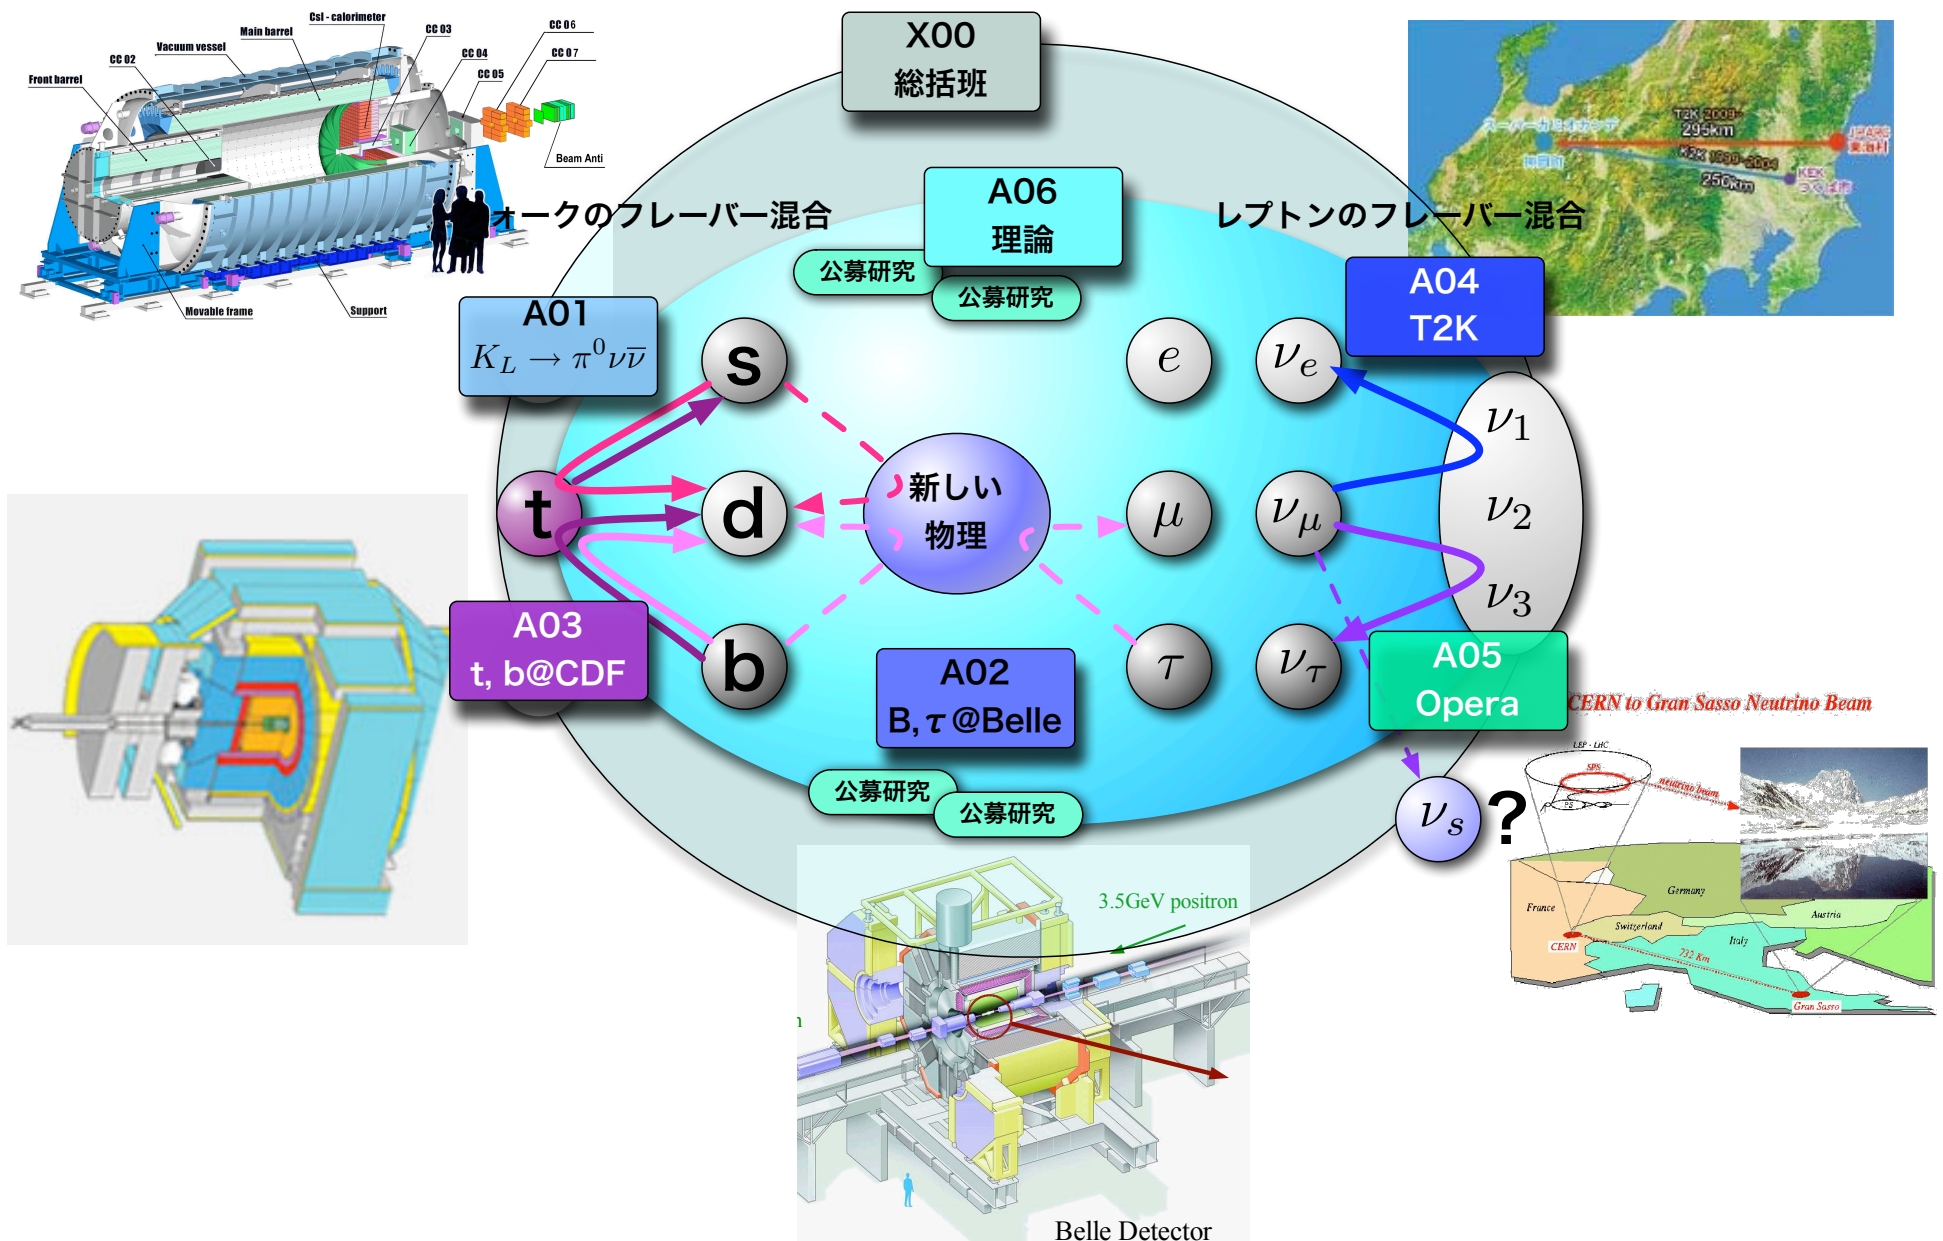

We are here, because

- instead of fighting over a resource,
- we joined together to get a bigger resource

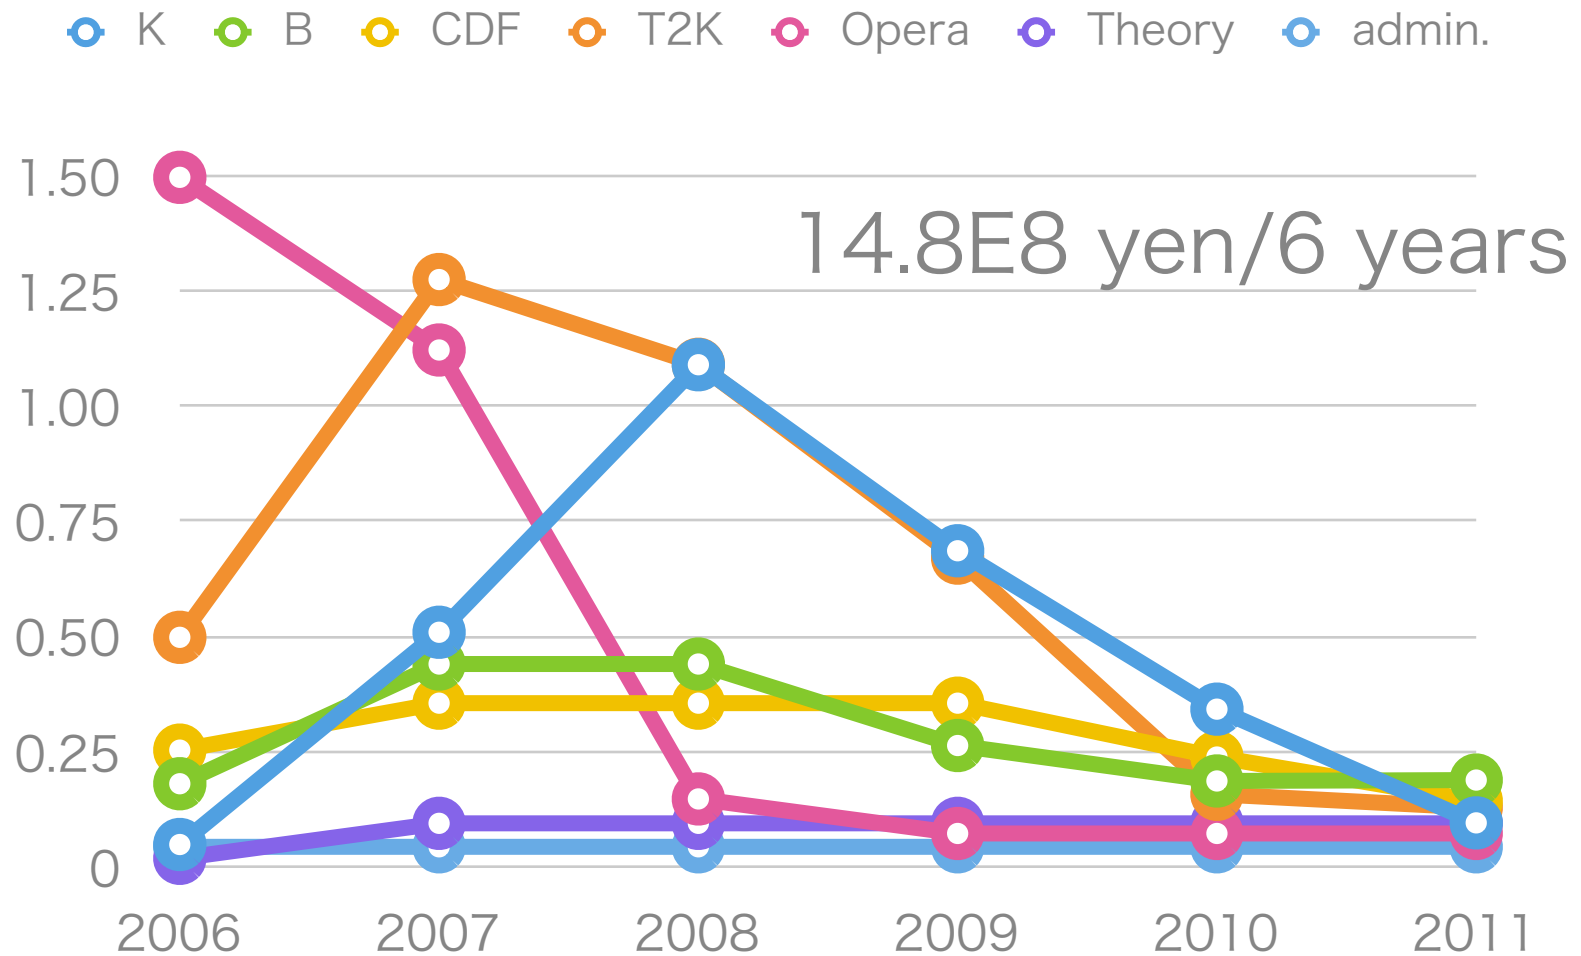

The resource

- 特定領域研究
- 「フレーバー物理の新展開」
- Grant-in-aid for Specific Fields
- “New Developments of Flavor Physics”

for 5 experiments + theory

Budget

In this workshop, we can

- hear hot results and status of other experiments directly,
- ask stupid questions,
- eat and drink together,
- enjoy hot spring, and
- get to know each other better.

But this year,

- somewhat formal
- there were few questions by students,
- some talks were too difficult for experimentalists

Next year

- Organized by Tsukuba Univ. group
- Location: undecided
- Requirements:
 - can stay, eat and drink together
 - no network for better communication

Next year

- Try something to
 - encourage talks by students
 - encourage questions by students
 - encourage more stupid questions

Let's thank

- All the participants for coming from all over the world
- All the speakers for preparing their talks
- And 居波(Inami)-san, 原(Hara)-san, 森(Mori)-san and 綱田(Tsunada)-san for organizing the workshop

See you at

- KEK, J-PARC, CERN, Fermilab, airport, or at the
- Gamagori Station
